Subject: Microsoft Settlement

Dear Sir,

The settlement is a big insult to the US Judiciary System and criminal collusion between the Justice Department and the convicted monopoly. Kindly consider the following facts:

1. Microsoft has killed a very innovative and revolutionary company called Netscape. It must be punished severely for that crime. The judge should not hear any argument or compromise on this fact. The Justice Department just turned its eye on this very simple crime.
2. Microsoft has illegally charged the vulnerable people and companies for its software. If you see the trend in the IT industry for last 10-15 years, the hardware prices have dropped from by 10 times (from \$4000-\$5000 range to \$400-\$1000) and their capacity and power has increased by 10-15 times, where as Microsoft has sold the same junk again and again at the same or increased price. They have never reduced their software's prices while the whole industry have reduced their prices by 10-15 times.
3. The Distict court and the Appeals Court have unanimously convicted Microsoft as illegal monopoly, it must be punished. Even though it's very rich and influential, I think the US Judicial System must be higher and powerful than any criminal.
4. I term Microsoft as a Tech Terrorist. It has terrorized many small companies including Netscape, Apple, Novell, IBM, Sun, Coral, and many many more. I have seen it for last 10-15 years.

Let justice prevail.

With regards,

Karulal Choudhary
